

Mate & Rix

BIG

Number Addition

Mate and Rix Escape Boredom
Common Core math standards 2.NBT.5.

Background for teachers, parents, and caregivers

There are various methods people use for multi-digit addition. One of these methods is called the partial-sums method. It is the method Mate and Rix use in the book.

Students learn to:

- Identify the place value of digits in the numbers
- Write numbers in expanded notation
- Visualize the construction of multi-digit numbers

How the partial-sums addition strategy works

The partial-sums addition algorithm works by calculating one place value column at a time. Then, adding up those partial-sums to calculate the total. This is a flexible method. Students may perform this method left-to-right or right-to-left and compute the correct total.

Find $29 + 47$	Ten	Ones
	2	9
	+ 4	7
Add the tens: $20 + 40 =$	6	0
Add the ones: $9 + 7 =$	+ 1	6
Add the partial sums =	7	6
So, $29 + 47 = 76$		

What about the traditional mathematics approach of 'carry the one'?

When computing a sum, if the numbers are greater than 9 in a given place value column that larger value is accounted for by writing a 'one' in the column to the left. This strategy can be difficult for students to comprehend at first. That is why the partial-sums strategy helps students get the foundation they need to succeed before using the shortcut of 'carrying the one.'

Read Our Book

A boring night at the pet store turns into a night of fun when Mate and Rix build a fort using addition with regrouping.

Number Addition

Mate and Rix Escape Boredom
Common Core math standards 2.NBT.5.

"Rix, I found more pennies for our fort!"

"How many pennies did you find, Mate?"

"I found 10 and 7.
That is 17."

1

7

"I have 20 and 5.
That's 25."

Tens	Ones
2	5

"Mate, let's see how much we have together."

"Add the tens, first."

"Next, add the ones."

"Seven plus five equals twelve."

"Now add the partial sums."

	Tens	Ones
	1	7
	+ 2	5
<hr/>		
add the tens	3	0
add the ones	+ 1	2
<hr/>		
Sum	4	2

"We're rollin' in 42 pennies!"

"Now it's your turn."

"How'd adding the tens go?"

Tens Ones

1 5

+ 3 7

add the tens

4 0

add the ones +

Sum

"Did you add the ones?"

Tens Ones

	1	5
+	3	7
<hr/>		
add the tens	4	0
add the ones	+	1 2
<hr/>		
Sum		

"How'd adding the partial sums go?"

Tens Ones

$$\begin{array}{r} 15 \\ + 37 \\ \hline \end{array}$$

add the tens

$$\begin{array}{r} 40 \\ + 12 \\ \hline \end{array}$$

Sum

$$\begin{array}{r} 52 \end{array}$$

"Yay! They are learning
with us!"

"They want our book, Rix!"

"Yay! More math friends."
